ELSEVIER

European Journal of Operational Research 139 (2002) 688–690

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/dsw

Contents Volume 139

1 A survey of the state-of-the-art of common due date assignment and scheduling research
V. Gordon, J.-M. Proth and C. Chu

26 A weight set decomposition algorithm for finding all efficient extreme points in the outcome set of a multiple objective linear program
H.P. Benson and E. Sun

42 Relief period optimization under budget constraints
R.L. Tobin

62 A modified goal programming model for piecewise linear functions
C.-T. Chang

68 Evaluating environmental performance using statistical process control techniques
C.J. Corbett and J.-N. Pan

84 An efficient and flexible mechanism for constructing membership functions
A.L. Medaglia, S.-C. Fang, H.L.W. Nuttle and J.R. Wilson

96 Reliability of several component sets with inspections at random times
L. Dieulle

115 Non-parametric tests of returns to scale
L. Simar and P.W. Wilson

133 Bayesian enhanced strategic decision making for reliability
D.F. Percy

146 Optimal maintenance strategies for systems with partial repair options and without assuming bounded costs
P. Bruns

166 A survey analysis of service quality for domestic airlines
Y.-H. Chang and C.-H. Yeh

178 Viability of infeasible portfolio selection problems: A fuzzy approach
T. León, V. Liern and E. Vercher

191 O.R. for innovation and quality of life
B. Matarazzo and J. Teghem

193 Constraint deletion strategy in the inertia-controlling quadratic programming method
M.A. Gómez and L.P. Pedreira

206 Multiparametric demand transportation problem
C. Filippi and G. Romanin-Jacur

220 A period vehicle routing case study
S. Baptista, R. Carvalho Oliveira and E. Zúquete

230 Using real time information for effective dynamic scheduling
P. Cowling and M. Johansson

245 Nonpreemptive flowshop scheduling with machine dominance
O. Čepek, M. Okada and M. Vlach

S. Baptista, R. Carvalho Oliveira and E. Zúquete

230 Using real time information for effective dynamic scheduling
P. Cowling and M. Johansson

245 Nonpreemptive flowshop scheduling with machine dominance
O. Čepek, M. Okada and M. Vlach

262 Decentralized reactive Kanban system
K. Takahashi and N. Nakamura
277 Simultaneous lotsizing and scheduling on parallel machines
H. Meyr
293 An improved branch-and-bound algorithm for the two machine total completion time flow shop problem
F. Della Croce, M. Ghirardi and R. Tadei
302 Fuzzy interval and semi-orders
E. Haven
317 Determining the weights of criteria in the ELECTRE type methods with a revised Simos' procedure
J. Figueira and B. Roy
327 Selecting land mine detection strategies by means of outranking MCDM techniques
I. De Leeneer and H. Pastijn
339 Financial performance analysis of Ontario (Canada) Credit Unions: An application of DEA in the regulatory environment
P. Pille and J.C. Paradi
351 Correlated ARCH (CorrARCH): Modelling the time-varying conditional correlation between financial asset returns
G.A. Christodoulakis and S.E. Satchell
371 Multi-group discrimination using multi-criteria analysis: Illustrations from the field of finance
C. Zopounidis and M. Doumpos
390 A multicriteria model for assigning new orders to service suppliers
R. Carvalho Oliveira and J.C. Lourenço
400 Optimizing acyclic traffic signal switching sequences through an Extended Linear Complementarity Problem formulation
B. De Schutter
416 STEEDS: A strategic transport–energy–environment decision support
C. Brand, M. Mattarelli, D. Moon and R. Wolfler Calvo
436 Environmental site evaluation of waste management facilities embedded into EUGÈNE model: A multicriteria approach
K. Vaillancourt and J.-P. Waaub
449 A decision support system for the budgeting of the Belgian health care system
A. Mosmans, J.-C. Praet and C. Dumont
461 Two applications of noninvertible maps in communication and information storage
C. Mira, G. Millérioux and S. Rouabhi
469 A survey of maintenance policies of deteriorating systems
H. Wang
490 A lot-sizing problem in an automated foundry
E. dos Santos-Meza, M. Oliveira dos Santos and M. Nereu Arenales
501 Improved attribute acceptance sampling plans in the presence of misclassification error
E.P. Markowski and C.A. Markowski
511 The multiparametric 0–1-integer linear programming problem: A unified approach
A. Crema
521 Districting for salt spreading operations
L. Muyldermans, D. Cattrysse, D. Van Oudheusden and T. Lotan
533 Enumeration and interactive selection of efficient paths in a multiple criteria graph for scheduling an earth observing satellite
V. Gabrel and D. Vanderpooten

543 A novel chaotic search for quadratic assignment problems
M. Hasegawa, T. Ikeguchi, K. Aihara and K. Itoh
557 A new variant of a vehicle routing problem: Lower and upper bounds
H. Glaab
578 Solving some lexicographic multi-objective combinatorial problems
A. Volgenant
585 Accounting for time-varying queueing effects in workforce scheduling
A. Ingolfsson, Md. A. Haque and A. Umnikov
598 Technical efficiency and economies of scale: A non-parametric analysis of REIT operating efficiency
R.I. Anderson, R. Fok, T. Springer and J. Webb
613 On optimisation of agri chains by dynamic programming
J.K. Gigler, E.M.T. Hendrix, R.A. Heesen, V.G.W. van den Hazelkamp and G. Meerdink
626 A new venture's optimal entry time
M. Lévesque and D.A. Shepherd
643 Exploring efficiency differences over time in the Spanish banking industry
E. Tortosa-Ausina
665 The long-term impact of GHG reduction policies on global trade: A case study for the petrochemical industry
D.J. Gielen and H. Yagita
682 A note on an integrated model of customer buying behavior
P.S. Fader and B.G.S. Hardie
688 Contents Volume 139
